# Poseidon Hydro (Water) Curtain

(Indoors & Outdoors)

# A projection medium, created with water.

It consists of two basic modules (1) The Nozzle Section and (2) the Catch Trough or any water body. The Nozzle Section creates the planar water screen to be used as a projection surface. The Catch Trough recovers the water fallout, filters it and re-circulates it back to the Nozzle Section.

The Nozzle Sections are available in 2m length segments that are linked together "on-site" to form seamless screens to your desired length. The vertical placement of the Nozzle Section is only limited by the trim height of your venue. Currently available, screen sizes of up to 40 ft. (12m)

#### > Components:

- 2m Nozzle Sections
- ❖ Water Pump : 1 required for every 2m section
- ❖ Water Tank: Size available: 21 ft. OR 42 ft. (foldable & flight cased)
